Introduction

THE HEALTH INSURANCE PROGRAM FOR THE AGED, commonly known as Medicare, first became operational on July 1, 1966, under Title XVIII of the 1965 amendments to the Social Security Act. By the end of fiscal year 1967, the first full year of operation, nearly 19 million persons were enrolled in the hospital insurance program (HI or Part A) and almost 18 million under voluntary supplementary medical insurance (SMI or Part B). Payments to or on behalf of these enrollees totaled $3.2 billion the first year—$2.5 billion for HI benefits and $0.7 billion under SMI.

In comparison, during fiscal year 1972, Medicare's sixth year of operation, enrollment had increased to 21.0 million persons in HI and 20.1 million in SMI while total benefit payments rose to $8.4 billion—$6.1 under HI and $2.3 under SMI.

During FY 1972 the Medicare program continued to be the largest single public program for financing health care, accounting for 11 percent of the total health bill for that year, and about 46 percent of all Federal expenditures for health care. Medicare program expenditures during that year increased nearly $1 billion over FY 1971, reflecting primarily the overall increase in inpatient hospital cost.

Medicare expenditures and the program's impact on the provision of health care services and on providers of care will be further increased by major changes made in the program's provisions in 1972 by Public Law 92-603, enacted October 30, 1972.

In particular, effective July 1, 1973, Medicare protection was extended to approximately 1.7 million disabled persons under 65 years entitled to cash disability insurance benefits under the social security or railroad retirement programs, and to individuals under 65 years who require continuous dialysis or kidney transplantation for chronic end-stage renal disease. Initially, about 12,000 persons were expected to be eligible for coverage for chronic renal disease.

This publication summarizes some basic Medicare information for each State, the District of Columbia, and Puerto Rico. Data on enrollment, amounts reimbursed, the providers of services, as well as some utilization figures for hospitals and skilled nursing facilities (formerly extended care facilities) are presented for fiscal years 1968-1972. Data for fiscal year 1967 can be found in *Medicare, Selected State Data, Fiscal Years 1967-1970,* (DHEW Publication No. (SSA) 72-11750).

The Social Security Administration, through various other publications, makes available more detailed information on the operation of the Medicare program. A partial list of these publications is shown on page IV. A brief description of the program and definitions of terms used in this report are presented on page VI.

Explanatory Notes

Benefits of the program

Hospital Insurance (HI). The portion of the health insurance program that pays a large part of the cost of inpatient hospital care, posthospital extended care, home health service visits, and, until March 31, 1968, outpatient hospital diagnostic services. Hospital insurance pays for up to 90 days of hospitalization per benefit period. The benefit period begins with the first day of hospitalization and ends 60 days after discharge from the hospital or skilled nursing facility. Effective January 1, 1968, each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional days of inpatient hospital coverage. These additional days can be used at the patient's option whenever the 90 days covered in a benefit period are exhausted. Except for hospitals certified to provide emergency services only, payment is subject to the hospital's participation in the Medicare program, to an annually adjusted deductible, and to copayment for the 61st through 90th days of hospitalization per benefit period. At the start of the program, the deductible was $40 and the copayment $10 per day. Beginning January 1969, these respective amounts were raised to $44 and $11; January 1970, to $52 and $13; January 1971 to $60 and $15; and January 1972 to $68 and $17. Days used from the "lifetime reserve" were subject to copayment of $20 a day in 1968, and $22 a day for benefit periods beginning January 1969; $26 beginning January 1970; $30 beginning January 1971; and $34 beginning January 1972. Inpatient services in a tuberculosis or psychiatric hospital are included, with a lifetime limit of 190 days of covered services in psychiatric hospitals.

Hospital insurance also pays for all covered services in participating skilled nursing facilities (SNF) for the first 20 days of such care per benefit period, following discharge from a hospital after a stay of 3 days or more. Prior to the Social Security Amendments of 1972 the transfer of a Medicare patient to an SNF had to take place within 14 days of his discharge from a hospital. The 1972 amendments modified this requirement, effective October 30, 1972, to permit a longer interval for patients whose conditions do not permit provision of skilled nursing services within 14 days or when such care is not medically appropriate within 14 days after discharge from a hospital. An extension not to exceed 2 weeks beyond the original 14 days is authorized also in instances where admission to a facility is prevented because of a shortage of appropriate bed space.

The program pays for as many as 80 additional days in the SNF in the same benefit period, subject to a copayment of $5 a day in 1967 and 1968 and $5.50 for benefit periods beginning in 1969; $6.50 in 1970; $7.50 in 1971; and $8.50 in 1972. Up to 100 home health service visits provided by participating home health agencies are covered in the 12-month period following discharge from a participating hospital or SNF. Home health services must be established by the attending physician within 14 days after discharge from the participating hospital or SNF.

Supplementary Medical Insurance (SMI). The part of the program that provides payment for physicians' services, including home and office visits; up to 100 home health service visits per calendar year without prior hospitalization; outpatient hospital therapeutic services; outpatient physical therapy services; and after March 31, 1968, all outpatient hospital services, diagnostic X-rays and laboratory tests, radiation therapy, prosthetic devices, purchase or rental of durable medical equipment, ambulance services, and surgical dressings, splints, casts, and similar devices. After the beneficiary has paid the annual deductible ($50 for each calendar year through 1972 [1]) SMI pays for 80 percent of the allowed charges for covered services during the calendar year. Expenses incurred in the last quarter of a calendar year and applied to that year's deductible may also be applied to the deductible in the following calendar

[1] For services provided in 1973, the deductible was set at $60.

year. However, after March 31, 1968, the provisions concerning the deductible and the coinsurance do not apply to the services of radiologists and pathologists furnished to hospital inpatients. In addition, the provisions of the 1972 amendments eliminate coinsurance payments for home health services furnished after December 1972.

Definitions of terms

Persons enrolled for:

Hospital Insurance (HI). Persons who are eligible for hospital insurance and who have established entitlement to benefits by filing application with the Social Security Administration.

Supplementary Medical Insurance (SMI). Persons eligible for supplementary medical insurance who elect to enroll in the SMI program and agree to pay monthly premium, or have this amount paid in their behalf by a State welfare agency. The 1972 amendments provide for automatic enrollment in SMI (with an option to decline) of persons as they become entitled to HI. The premium was $3 a month prior to April 1, 1968; $4 from April 1968 through June 1970; $5.30 beginning July 1, 1970; $5.60 beginning July 1, 1971; $5.80 July 1, 1972; and effective July 1973 the new rate became $6.30 per month.

Hospital and/or Supplementary Medical Insurance. All persons who enroll under hospital insurance and/or supplementary medical insurance. This total is larger than the total for hospital insurance because a small number of persons are eligible for medical insurance but not for hospital insurance.

Amounts reimbursed:

HI. Amount paid by the intermediary to a provider for that part of covered services exceeding deductibles and coinsurance amounts. Includes outpatient services prior to April 1, 1968.

SMI. Represents 80 percent of charges for covered services each year after the individual has paid a deductible of the first $50 of such services during the calendar year. (For 1973 the deductible was set at $60.) The amount of charges must be classified as allowable by the carrier. Reimbursements for outpatient services April 1, 1968, and thereafter are included in the SMI totals.

Participating facilities:

HI. A hospital, skilled nursing facility, home health agency or independent laboratory. A provider of services is eligible for participation and payment if it meets the requirements for certification and has entered into an agreement with the Social Security Administration to provide services on a nondiscriminatory basis in compliance with Title VI of the Civil Rights Act of 1964, and not to charge any patient or other person for covered items and services except deductibles and coinsurance amounts.

Short-stay hospital. General and special hospitals reporting average stays of less than 30 days.

Long-stay hospital. General and special hospitals reporting average stays of 30 days or more, as well as tuberculosis, psychiatric, and chronic disease hospitals.

Skilled nursing facility. An institution which is primarily engaged in providing skilled nursing care and related services for patients who require posthospital medical or nursing care or rehabilitation services. Excludes institutions which are primarily for care and treatment with respect to mental disease or tuberculosis.

Hospital beds. Includes beds regularly available for use by inpatients. Excludes bassinets and pediatric beds, and beds in facilities that are set up and staffed only for patients receiving special procedures for a portion of their stay, or which are used only as holding facilities prior to transfer to another hospital.

Nursing beds. Includes beds regularly available for use by inpatients receiving skilled nursing care and related services or rehabilitation services under the supervision of at least one physician and one registered nurse, with 24-hour nursing service.

Home health agency. An agency which furnishes services to a patient in his home by providing skilled nursing and other therapeutic services under a plan established and supervised by a physician. Services may include part-time nursing; services

of a home health aide; physical, occupational, or speech therapy; medical social services; and medical supplies (except drugs) and equipment.

Independent laboratory (SMI). A laboratory independent of a physician's office or a hospital which performs diagnostic laboratory tests ordered by a physician.

Admission rates. The number of hospital or skilled nursing facility admissions reported by the intermediaries to the Social Security Administration per 1,000 HI enrollees. The admission counts reflect the location of hospitals and SNF's to which the patient was admitted. Enrollment figures used in computing rates are for January 1, the midpoint of the indicated year, and reflect the beneficiary's State of residence.
